DETAILED ACTION

1. This Office action is responsive to the following communication: Original Application filed on 31 December 2003.
2. Claims 1-61 are pending and present for examination. Claims 1, 25, 27, 29, 30, 54, 56, 58, 59, and 61.

Election/Restrictions

3. This application contains claims directed to the following patentably distinct species:
 - a. Group I: Claims 1-24 and 30-53 relate to a method and a computer readable medium for receiving/creating a search query and determining a ranking score for the relevant article based on client-side behavior.
 - b. Group 2: Claims 25-26, 54-55, and 61 relate to determining client-side behavior data associated with an article.
 - c. Group 3: Claims 27-28 and 56-57 relate to determining a query-independent score for an article.
 - d. Group 4: Claims 29, 58, and 61 relate to identifying an article and displaying a score for the article based on client-side behavior data associated with the article.
 - e. Group 5: Claims 59-60 relate to a system comprising a processor, memory, client application, query processor, monitoring engine, a search engine, and a data store.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2161

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
